DETAILED ACTION

1. The Amendment filed on August 6, 2003 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1, 2, and 4-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Felde (DE 42 00 420 A1) in view of the Admitted Prior Art (hereinafter referred to as Prior Art - p. 3).

Felde discloses the invention substantially as claimed except for the cubic boron nitride (CBN) tip. It appears that the tip is PCD. Note c. 2, ll. 55-60. However, the Prior Art teaches that PCD and CBN tips are equivalent in the art. Application

Art Unit: 3724

Specification, p. 3, ll. 17-25. Thus, it would have been obvious to the ordinary artisan at the time of the instant invention to substitute the CBN tip as taught by the Prior Art for the PCD of Felde, since both are deemed to be equivalent hard materials for the cutting tips in the sawing art, since they both work equally well, and a selection of one or the other would have been an obvious matter of design choice.

Response to Arguments

5. Applicant's arguments with respect to claims 1, 2 and 4-11 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles Goodman whose telephone number is (703) 308-0501. The examiner can normally be reached on Monday-Thursday between 7:30 AM to 6:00 PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan Shoap, can be reached on (703) 308-1082.
